Subject: AdvaMed Letter to EPA re: Ethylene oxide (EtO)

On behalf of our client Advamed, I wanted to make sure you were aware that AdvaMed submitted the attached letter to Administrator Wheeler earlier this week regarding the use of ethylene oxide (EtO) in medical device sterilization and recent EPA risk assessments of its use and health effects. As you may know, Advamed is a trade association that represents the world's leading innovators and manufacturers of medical devices, diagnostic products, and health information systems. Advamed did submit this letter to the agency on September 24, 2018, but I wanted to make sure Administrator Wheeler and your team had the letter in your hands as soon as possible.

Please let me know if you have any questions and many thanks for the consideration of this request. Best – Randi
